

TRAMCO STANDARD INSPECTION PACKAGE

Includes all Tramco conveyors, in use at your facility, to check for undue wear or stress placed on the conveyors. This package allows for an average of 1 hour to be spent on each conveyor to determine/assess the reliability of the conveyor to meet required performance expectations.

Standard Inspection includes these points for each conveyor:

- Visual review of each operating conveyor.
- Inspect head & tail sprockets for wear/damage.
- Inspect bearings for wear/damage.
- Inspect drive components.
- Inspect conveyor intermediate section for undue wear/damage both inside and externally.
- Inspect overall alignment of the conveyor.
- Inspect drive mount for stress or wear.
- Standard inspection is strictly a visual function, no covers removed, visual inspection of chain, sprockets, belts will be viewed through inspection doors.
- Inspect gates, if installed, for proper alignment and functionality.

Cost for Tramco Standard Inspection package, is **\$1,675.00** per day, based upon 8 hour day at site. Included in this cost are all expenses for the Tramco Field Service Engineer to perform this inspection per your allotted time.

If you are interested in scheduling an inspection, please call:

Kevin Byfield, Field Service Engineer | 316.247.5464

Mark Cloud, Technical Manager | 316.491.8221

Tramco looks forward to offering your facility our inspection services.
