

Laycote Automated Coating System

A New Generation of Liquid & Powder Coating by AGI Fertilizer Systems

LAYCOTE Automated Coating Systems provide a new level of coating accuracy. Utilizing automation technology as well as positive feedback monitoring to accurately meter and impregnate liquids or powders per the required rate to maximize the coating process.

LAYCOTE 200

Automated Liquid Coating System that can be integrated easily into the Layco Automated Blending System or used as a separate coating system to provide fast, efficient coating for bulk storage or bagging systems.

- Single Ribbon Auger
- Multiple Spray Points

LAYCOTE 400

A Dual Ribbon Auger High-Capacity System is designed to coat liquids or powders effectively in a continuous blending or coating system.

- Dual Ribbon Auger
- Multiple Spray Point Configuration

LAYCOTE BATCH OR CONTINUOUS BLENDING

Rotary Valve, Flat Wire Chain and Metering Augers have the capacity of metering in ounces-per-minute up to tons-per-hour.

- Declining Weight Blender
- Rotary Drum Blender
- Tapered Vertical Blender

LAYCOTE POWDER HANDLING SYSTEM

An automated Powder Coating System designed to accurately deliver powders onto dry blends utilizing Layco's Automation Technology.

- Low Product Sensor
- Screw Auger Monitoring System
- Unique Airvibe System

Yargus is an AGI brand.

AGI is a leading manufacturer of grain, seed, feed, food and fertilizer handling, blending, storage and conditioning equipment. Our brands are amongst the most recognized in the industry. The AGI product catalog includes portable handling equipment (augers, belt conveyors, grain vacs), permanent handling systems (bucket elevators, enclosed belt conveyors, chain conveyors, structural) and storage systems (aeration, drying, bins/silos, monitoring) that service various sectors for on-farm and commercial operations.

AGI YARGUS

COATING AUTOMATION

A Yargus proprietary software designed to control the flow of material as well as coating materials. The result is an accurate and controlled coating system that allows the operator to automatically set the required tonnage to coat the required product from a computer or tablet.
