B2. Spiral stairway**B.2 - AGI EMEA SPIRAL STAIRWAY**

Positioned around the circumference of the silo cylinder, the AGI EMEA galvanized spiral stairway provides an easy access to the roof manhole and to the eave level for any maintenance or inspection activities required. It is supplied with a 1,000x1,000 mm platform on eave level, and one-sided safety handrail. Multiple rest platforms available as optional in order to meet local safety regulations.

Suitable for all flat bottom and hopper silos models.
